The extensive Fibrics pottery collection exists of straight flowerpots, bowls, balcony troughs, trays and hanging baskets.

- Bio sustainable
- Strong and light weighted
- Elegant designs
- Natural color created by used fibers
- Every pot contains bamboo fiber
- Indoor and outdoor use (water plug inside)

### The unique sustainability of Bamboo

Bamboo is a highly sustainable crop as it does not claim farming lands, grows very fast, needs minimal care without use of toxic chemical pesticides. It is a much better CO<sub>2</sub> extractor and oxygen emitter than trees. All Fibrics products are bio sustainable as they are made of a mixture of bamboo fibers and other agricultural waste like coffee beans, wheat shells etc. With the addition of a small amount of fossil based resin, all Fibrics products are strong and light weighted. Fibrics also strives to make the resin from agricultural material so that our products will be completely recyclable.
